Prague is our home: A common path to integration is a project implemented by Integration Center Prague in collaboration with the Prague City Hall. Our goal is to help foreigners who have decided to live in the capital make their integration easier and to provide them with important and reliable information in one place. We would like to make foreigners feel at home in Prague. The website "Prague is our home" was created as a microsite of the main information portal for foreigners living in Prague "Prague for all" (<https://metropolevsech.eu>).
