

Volunteering

A great way to get to know Czech culture and language, make new friends, and contribute to society is through volunteering—doing socially beneficial activities without expecting financial reward.

You can volunteer in your free time, filling it with meaningful activities. Plus, the volunteer experience will be good for your CV.

Volunteering allows you to engage in a variety of causes, such as working with socially or medically disadvantaged people, protecting human rights, protecting nature, supporting cultural life, humanitarian aid or volunteering in sports and educational activities.

There are many organizations and initiatives in the Czech Republic that offer volunteer opportunities and encourage the involvement of foreigners.
